

Join the Greater Victoria 2030 District!

Be part of collaborative effort to cut energy use and greenhouse gas emissions in buildings while improving affordability and climate resilience. Commercial properties in participating CRD municipalities can join for free and access tailored support, useful resources, and peer networking. Join at one of three tiers - Participant, Leader, or Champion.

Participant Members

Participants join the District to learn about opportunities to reduce energy use and greenhouse gas emissions, access performance benchmarking and begin planning improvements.

Commitment Level

- Identifying opportunities for operational and retrofit improvements.
- Engaging in learning and peer exchange to build internal capacity.

Participants help scale the 2030 District's impact across diverse building types, showing that meaningful climate action is achievable for any building.

Leader Members

Leaders commit to participating in building performance benchmarking and are taking concrete actions to reduce emissions, improve energy efficiency, and enhance resilience.

Commitment Level

- Has shared building performance data with the 2030 District and is accessing benchmarking support for committed buildings.
- GV 2030 District portfolio is implementing operational and/or capital retrofit measures aligned with 2030 District targets (from a 2007 benchmark):
 - 50% EUI by 2030
 - 50% GHGI by 2030
 - Net Zero 2040 & Resilient
- Sharing results and lessons with peers to accelerate sector learning.

Leaders embody the 2030 District's mission to accelerate emissions reductions. Their actions create business value and demonstrate regulatory readiness and climate leadership.

Champion Members

Champions are recognized for deep, sustained actions to achieve net-zero operational emissions and long-term climate resilience across their portfolios.

Commitment Level

- Achieved or exceeded Greater Victoria 2030 District targets (e.g. 80% GHG reduction by 2030 from a 2007 benchmark) in at least one GV 2030 District building.
- Pursuing deep retrofits or fuel-switching aligned with the District's 2040 net-zero and resilience goals.
- Resilience, equity, and affordability considerations are integrated into retrofit planning.
- Mentor other members and contribute to innovation, advocacy, or pilot projects.

Champions exemplify the District's vision for a resilient, net-zero built environment, modeling a clear pathway to accelerated action.

Membership benefits at a glance

Joining the Greater Victoria 2030 District connects you to a powerful network committed to improving the performance, resilience, and value of existing buildings across our region. Members gain access to practical tools, expert support, and opportunities to lead.

Peer Support & Compliance Help

Connect with local property managers and tap into shared expertise—especially helpful for navigating energy-reporting bylaws.

Customized Benchmarking Report

Clear, actionable insights on how your building performs and where improvements can make the biggest impact.

Direct Access to Specialists

Get advice from engineers, policy experts, utilities, and government partners to accelerate retrofit planning and implementation.

Leadership Recognition

Showcase your commitment to high-performance buildings and strengthen your brand through District recognition.

Tools, Programs & Tailored Support

Access GV2030 guidance, resources, and hands-on help to advance your energy, emissions, and resilience goals.

Influence & Advocacy

Shape program design and regional advocacy through your participation and feedback.

Research & Piloting Opportunities

Participate in innovative projects that support low-carbon, climate-ready building management.

Up-to-Date Incentives & Financing Info

Stay informed about grants, rebates, and creative financing strategies—all in one place.

Ongoing Training & Learning

Workshops, briefings, and training sessions to support continuous improvement across your portfolio.

Energy & GHG Tracking

Monitor progress toward District targets, with support through Energy Star Portfolio Manager and other tools.

Expanded Benchmarking Insights

Gain year-over-year performance comparisons and peer benchmarking through Building Benchmark BC.
